

Sainath Gandhe

Fullerton, CA (Open to Relocate) | 714-519-7072 | gandhe.sainath@csu.fullerton.edu | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

OVERVIEW

Software Engineer with **2 years of experience** building scalable full-stack systems and secure cloud native backends. Skilled in delivering enterprise solutions and integrating AI/LLMs into production workflows. Recognized for optimizing performance and leading in Agile teams, with a strong track record of quickly learning and applying new technologies to solve real world problems. Proven innovator, selected to build and pitch AI products at Y Combinator Headquarters.

SKILLS

- Programming Languages:** JavaScript/TypeScript, Java, Python, SQL.
- Frameworks & Libraries:** Vue (Nuxt), React (Next.js), Spring Boot, Node.js, Express.js, Flask.
- Development Methods:** REST/GraphQL APIs, System Design, Microservices, Distributed Systems, Unit/Integration Testing.
- Database & Data Engineering:** MongoDB, PostgreSQL, MySQL, Redis.
- Cloud Platforms & DevOps:** AWS (Lambda, EC2, S3), Cloudflare, Kubernetes, Docker.
- AI & Machine Learning:** OpenAI APIs, LangChain, TensorFlow, PyTorch, LLM fine tuning.
- Tools & Collaboration:** Git, Prometheus, Jenkins, Grafana.

EXPERIENCE

UPLANE

Jan 2026 – Present

Full Stack Engineer

San Francisco, USA (Remote)

- Built full-stack asset management and campaign workflow system using TypeScript, Vue/Nuxt, and Express, reducing campaign setup time for users.
- Orchestrated AI-driven ad and landing page generation pipelines powering Uplane's core automation platform, building multi-step LangGraph workflows with Inngest, improving traceability across LLM executions, and enabling **30-40% ROAS** improvement.
- Architected scalable media infrastructure for high-volume creative generation using Cloudflare R2 and CDN backed delivery, eliminating server-side upload bottlenecks and reducing memory overhead by **60%**, resulting in faster asset load times across user workflows serving **10K+** of generated ads.
- Designed cross-workspace campaign portability system for ad concepts, landing pages, and brands, implementing dependency-aware replication that reduced manual setup effort by **70%** and unblocking multi-tenant scaling that supported the company's growth.

MINEDCO

Jun 2025 – Sep 2025

AI Software Engineer Intern

Virginia, USA (Remote)

- Owned the design and delivery of the React.js/Next.js frontend for the LiveOn MVP, implementing TailwindCSS to improve responsiveness by **40%**.
- Proposed and integrated secure authentication flows with Google OAuth (JWT), reducing login failures by **35%** and streamlining sign-in for **250+** test users, automated workflows that saved the team **20%** in session handling time.
- Partnered with product lead and AI/ML engineers to accelerate MVP launch using OpenAI APIs and LangChain, while setting up CI/CD pipelines with GitHub Actions that cut deployment cycles in half.
- Mentored 2 junior interns in session management and auth module, leading to **400+** successful test sessions and zero critical defects at MVP launch.

BOEING

Aug 2023 - Aug 2024

Software Developer

Bangalore, India (Hybrid)

- Led full-stack development of the Critical Parts Tracking System (CPTS), architected Spring Boot microservices and Angular user interface used daily by **3,000+** global operators, boosting reporting accuracy by **25%**.
- Coordinated a 5-member team through sprints, drove cross-team integration with supplier databases, and performed end-to-end testing (unit, integration, regression) that cut defects by **30%** and shortened reporting cycles by 2 days per week.
- Optimized the Wireless Business Management System (WBMS) used by **8000+** engineers with React-based enhancements, introducing live data synchronization that lowered latency by **15%**, and improved operational efficiency.
- Honored with Boeing's "**Top Talent Award**" for Junior Engineers in Q1 2024, standing out among 16 teams in the M&Q division of the BDS Sector.

PROJECTS AND RESEARCH

[SafarAI](#) (FastAPI, MongoDB, Firecrawl, Reducto, Resend) – **Shipped at Y Combinator, San Francisco**

- Engineered a competitive intelligence pipeline ingesting **50+ sources** of tourism, partnerships, funding, and campaigns using web and PDF extraction.
- Built hash-based change detection and structured LLM classification to auto generate executive briefings, reducing manual monitoring effort by **80%**.

[Synapse AI – AI Knowledge Mesh](#) (OpenAI Embeddings, MongoDB, Next.js, Data Connectors, Vercel) – **Shipped at Y Combinator, San Francisco**

- Selected from **2000+** applicants (**Top 5%**) to build an AI-powered Organizational Intelligence Platform integrating Slack, GitHub, and Notion.
- Collaborated with mentors from **Anthropic & AWS**, applying principles of distributed system design and multi-agent reasoning for enterprise use cases.

[Cloud Document Summarizer](#) (React, Node.js, AWS Lambda, GraphQL, LangChain, Kubernetes) – **Personal Project**

- Developed an AI summarizer for PDFs/Word docs/Slides across Google Drive/OneDrive/AWS S3, condensing **500+ pages** with semantic Q&A search.

[Stock Price Prediction](#) (LSTM, Time Series Forecasting, Python, TensorFlow, Pandas, NumPy, Matplotlib) – **Published Research (IJSREM 2022)**

- Developed an LSTM based model that outperformed ARIMA by 10 % accuracy, leveraging **1.2 M+ historical market records** spanning five years.

[G – Notify](#) (Email Automation, Python, Gmail API, Flask, HTML/CSS templates, Cron Jobs) – **Published Research (IRJMETS 2023)**

- Automated delivery of **10,000+ personalized emails** daily with a 98% success rate, boosting client campaign reach and engagement.

EDUCATION

Master of Science in Computer Science, California State University, Fullerton

Aug 2024 - Present

- GPA: 3.94/4.0**, Relevant Coursework: Artificial Intelligence, Software Architecture, Algorithms, Advanced Computer Networking, Cloud Computing.

Bachelor of Engineering in Computer Science, The National Institute of Engineering, Mysuru

Aug 2019 - Aug 2023

- GPA: 3.52/4.0**, Relevant Coursework: Operating Systems, Machine Learning, Computer Networks, Database Management, Software Engineering.

CERTIFICATIONS

MongoDB Certified Developer Associate (C100DEV, 2025) | AWS Certified Developer (DVA-CO2, 2024)
